

Cheyenne

Household heat pump water heater (split type)

Environment protection: No pollution and waste is discharged during the entire working cycle.

Safety: Eliminated the problems of traditional normal water generator.

Reliable: Service life can reach up to 15 years. Low maintenance cost.

Economy: (all weather operation) the system will continue to run and not be affected by weather patterns including snow or rain.

Modular design: We can add on more units according to user's requirement. Suitable for -10 ~ +45 ambient temperature. Color Armor Plate water tank Stainless Steel water tank
